

THE FORGOTTEN CHILD
Siblings of physically or mentally challenged children

Table of contents

1. The right to suffer

Why society unjustly hierarchizes suffering and how thus the trap of the forgotten child is set.

2. Basic needs

Similarities with not-forgotten peers and what may stand in the way of providing for those needs.

3. The need for normality...

... and how its manifestation is a sign of mental health.

4. The special needs of the siblings of children with special needs

How unspoken and forbidden feelings may increase the forgotten child's suffering as compared to the siblings that is ill and how providing for those special needs is actually within control of the parent.
